

OMG.....Harry would have to be one of the sweetest, smoochiest peiby"s we have ever met in at SPR Inc! Harry has the most pleasing, most divine nature who just wants to love and be loved. Harry is WONDERFUL with big kids, little kids, cats, other dogs, the old, the young - Harry couldn't care less just so long as he is included in the family!! Harry was a surrender into a local pound, most likely because of the extensive and costly surgery he needed to his eyes. So at about 7 mths, Harry has been desexed, vaccinated, has had entropion surgery, is microchipped and ready and rearing to head off to his new home with you!!! Harry is only a little pei, and he won't grow any taller now, but will continue to fill out over the next few months. Harry has a breed fault we see from time to time, being that his ears point up to the sky instead of folding over. None to worry, this doesn't effect his beautiful nature one little bit!

Available for much less than the cost of his vet work, Harry can be yours for a donation to SPR Inc of just \$600.
